Instructions:

1. Color mask as you wish using crayons or washable markers.
2. Print out mask document using a thicker paper like business card paper for example. Check your printers operating manual to decipher the max thickness your printer will take.
3. Cut out mask and use a pointed object or awl to make the little holes in sides
4. Grab some string, ribbon, or whatever works for you.
5. Put string, ribbon, etc. through the holes knotting one end.
6. Voila! Tie mask on head. Have fun!

NOTE:

You can use regular printer paper if you choose. It's just that using a thicker paper will of course make the mask sturdier and less apt to ripping accidentally.
